Prescribed Transmission Services Prices for 2017-18

To apply from 1 July 2017 to 30 June 2018 (inclusive of GST)

Notes:

1. TUoS is Transmission Use of System.
2. The prescribed transmission prices in the above table have been calculated in accordance with the National Electricity Rules and TasNetworks' Pricing Methodology which was approved by the Australian Energy Regulator.
3. The table above sets out prescribed transmission network prices and exit prices for connection points to the distribution network only. Prices for generators, non-distributor connection points and non-prescribed transmission services are not included.
4. Prescribed TUoS Services Locational Prices – the customer's contract demand is used to determine the charge.
5. Prescribed TUoS Services Non-Locational Prices – either the capacity or energy price is applicable, depending on whether the customer load factor is above (capacity) or below (energy) the median load factor for Tasmania. Where the capacity price is applicable, the customer's contract demand is used to determine the charge. Where the energy price is applicable, historical energy is generally used to determine the charge.
6. Prescribed Common Transmission Service Price – either the capacity or energy price is applicable, depending on whether the customer load factor is above (capacity) or below (energy) the median load factor for Tasmania. Where the capacity price is applicable, the customer's contract demand is used to determine the charge. Where the energy price is applicable, historical energy is generally used to determine the charge.
7. Prices for connection sites added after 1 July 2017 will be determined through application of TasNetworks' Pricing Methodology.
